PRINCIPAL CITIES.

(Tables 42 and 43.)

EXPLANATORY NOTES.

The general tables for principal cities present, first (Table 42), for each of the 161 cities having 25,000 inhabitants or more in 1900, the number of persons 10 years of age and over, distinguished by sex, engaged in each of 140 groups of occupations; and second (Table 43), for each of the 78 cities having 50,000 inhabitants or more in 1900, the number of persons of each sex 10 years of age and over engaged in selected groups of occupations (including, in many cases, minor occupation designations), classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage. The tables are as follows:

Table 42.—Total males and females 10 years of age and over engaged in each of 140 groups of occupations, for cities having 25,000 inhabitants or more: 1900.

Table 43.—Total males and females 10 years of age and over engaged in selected groups of occupations, classified by general nativity, color, conjugal condition, months unemployed, age periods, and parentage, for cities having 50,000 inhabitants or more: 1900.

A statement concerning the classification of occupations in 1900 as compared with former censuses is given in the explanatory text (Chapter I) preceding the general tables.

The terms used in Table 43 are explained as follows:

COLORED.—Persons of negro descent, Chinese, Japanese, and Indians.

NEGRO.—All persons of negro descent.

PARENTAGE:

Foreign parentage (or parents).—All persons, either of native or foreign birth, having either one or both parents foreign born.

Mixed foreign parentage.—All persons, either of native or foreign birth, having both parents foreign born but of different nationalities, as father born in Ireland and mother born in England, father born in Germany and mother born in Austria, etc.

Native parentage (or parents).—All persons, either of native or foreign birth, having both parents native born, or one parent native born and one parent for whom the birthplace is unknown, or both parents for whom the birthplace is unknown. Persons of this last description are sometimes referred to by the term "unknown parentage," but they are not of sufficient importance numerically to justify separate classification and are accordingly included with the class of native parentage.

UNEMPLOYED.—Persons ordinarily engaged in gainful labor but not employed during some portion of the census year (June 1, 1899 to May 31, 1900). The statistics are presented in connection with the occupations upon which persons so reported depend chiefly for support or in which they are usually engaged for the larger part of the time, in order to show to what extent the different classes of productive workers were unemployed during any portion of the census year, either at their customary occupation or in any other form of remunerative work, as more fully explained in the analytical text preceding the general tables.
